

Sciences Po Paris - Reims
THE ECONOMY - Seminar
Groups 3-4-6

SYLLABUS AND COURSE INTRODUCTION

1 Housekeeping

- **Scheduling.** The seminar takes place on Wednesdays from 14:30 to 16:30 / 16:40 to 18:40 / 18:50 to 20:50. There is **no class on February 7th**. There will be an additional seminar during the semester.
 - **In person vs. online.** As all lectures and seminars are in person, the plan remains - in accordance with Sciences Po regulations - to not have a hybrid format and to not record the lectures or seminars.
- **Course Material.** All the course material related to the seminar will be made available on Moodle specific to the seminar. This includes slides, problem sets and other readings for the course.
- **Contact.** You can always email me at: emirtarik.dakin@sciencespo.fr

The office hours will be determined in the coming weeks and will be available on appointment by email.

2 Assessment and Grading

The grade for the seminar represents 2/3 of your total grade for this course. The remaining 1/3 comes from the final exam. Within the grade for the seminar, there are three components, each worth 1/3 of your grade (or 2/9 of total grade):

- **Midterm.** The midterm takes place on a Saturday on March 23rd, and makes up 1/3 of your seminar grade.
- **Problem Sets.** There are 11 problem sets, one for each lecture starting from Lecture 1. For problem sets 2 to 11, you are asked to write up and hand in a complete answer to **ONE** of the questions in the problem set, at the start of the seminar that takes place the following week. The question will be pre-assigned the week before. You must thus hand in 10 completed questions across the semester, of which your best 8 will be chosen. However, if you fail to hand in 10 completed questions, then for each question you fail to hand in, you will get a zero that will be counted among your best 8. The total grade for the problem sets will count as 1/3 of your seminar grade.
- **Pop-quizzes and participation.** There will be 6 quizzes during the semester at random weeks. These will be easy 5-10min in-class tests (possibly MCQ) to help you prepare for the midterm and the exam. Your best 5 will determine your grade. In addition, you will all receive a score between 1-10 that is based on your meaningful contribution to the seminar sessions.

A summary of the assessment weights is as follows:

Assessment type	no. of assessments	Grade per assessment	Total grade
PSets	10 questions, 8 best	2.8%	22.2%
Quizzes	6 quizzes, 5 best	3%	15%
Participation	continuous	7.2%	7.2%
Midterm	3h	22.2%	22.2%
Final	3h	33.3%	33.3%

3 Expectations

- Come prepared to each class with the PSet done, and ready to discuss. Do the readings, attend the lectures. It is okay to struggle - that is part of the process, we will go through them in class.
- A checklist of all the key learning points will be given: both in terms of concepts to understand and problem-solving skills to master. Rely on this heavily to revise.
- Questions we do not go through in class are for you to practice. Don't assume that what we don't do in class will not be tested.
- Since this is a class of diverse backgrounds, be respectful of all questions that may be asked - even if you think they are obvious. Appreciate that everyone may be at different stages of their learning journey, and that our job as a learning community is to support, not denigrate one another.
